

Theme: ECE x USC

Design colors: black, white, USC red (#990000), USC yellow (#FFC72C)

Please find the inspiration to each component (A-H) of the design below.

A & B: Incorporate full name of Ming Hsieh Institute and USC Viterbi. An extra official logo on the left arm.

C: Engineer On, inspired by Fight On 🙌

D: Mountain, representing our spirit to keep climbing, keep going and keep engineering for a better world. It also gives an aesthetic feeling to the T-shirt.

E: Sun with rays, inspired by sun and rays inside USC official logo. The sun center contains parts of a circuit board.

F: USC letters represented as quantum gates, inspired by quantum era.

G: Diode and resistant in electric circuit, representing our research pushing forward despite resistance.

H: Scattered symbols and greek letters to represent Ming Hsieh Institute's 11 main research areas (<https://minghsiehece.usc.edu/research/>)

I love vintage design and have always dreamed of having an ECE x USC themed T-shirt to wear to all kinds of occasion, including seminar or just hanging out with friends.

If you enjoy the design, please don't forget to vote for it! Thank you! :)
